

SD Card Adapter Module 3.3V-5V

An SD card adapter that works with SPI. The module works with with a 3.5V of 5V supply and needs to be controlled with 3.3V signals.

Pin	Description
(2x) GND	Ground, min
+3.3	Direct +3.3V supply*
+5	+5V supply that is converted to +3.3V*
CS	3.3V CS signal
MOSI	3.3V MOSI signal
SCK	3.3V SCK signal
MISO	3.3V MISO signal

* You may never use the +3.3V and +5V connected at the same time, just one of the two.
